DETAILED ACTION

The response to the restriction requirement is acknowledged and Applicant's arguments have merit. The restriction is withdrawn.

This application is in condition for allowance except for the following formal matters:

Claim 3 recites the limitation "said polarization maintaining optical fiber loop" in the first and second lines. It is recommended, at a minimum, that the word "said" be removed since the word "loop" has not previously been used in earlier claim(s) even though the concept of a loop exists already.

Drawings

Figures 5, 10, and 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-26 are allowed.

The prior art, either alone or in combination, does not disclose or render obvious a polarization maintaining coupler, coupling signal PMF loop to polarizer, a 1st and 2nd NLOLM each with a PMF loop and associated method, in combination with the rest of respective claim 1, 12, 20 , or 24.

It is noted that each of claim 1, 12, 20 , or 24 is allowable because the unique combination of each and every specific element stated in each said claim.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
